

# PixelG (\$PIXG) - Whitepaper

## 1. Introduction

PixelG is a utility token on the BNB Chain (PancakeSwap) that supports global development of video games and graphical technologies - from indie production to high-end PC projects. Through community engagement, Web3 technology, and transparent funding, \$PIXG aims to become a driving force for innovation in gaming and tech.

## 2. Vision

We believe in a future where creative developers around the world can access funding, tools, and exposure-regardless of location or budget. Blockchain provides a fair and decentralized foundation to build on.

## 3. Token Utility

- Funding for game developers (mobile, PC, console)
- Discounted game purchases on PixelG marketplace
- Rewards for players, devs, and supporters
- Community voting on funded projects
- Future support for hardware and chip development

## 4. Tokenomics

- Total Supply: 1,000,000,000 PIXG
- Allocation:
  - 40% Community & Airdrops
  - 20% Development & Research
  - 15% Partnerships
  - 15% Liquidity
  - 10% Reserve
- Contract: 0x7C7fdB3013C0786f5C84d51dC05b999AF1759Cd7
- Chain: BNB Chain (PancakeSwap)

## 5. Roadmap

- Q3 2025: Airdrop & Community Launch

- Q4 2025: Partnerships with indie studios
- Q1 2026: Beta launch of PixelG Marketplace
- Q2 2026: First grants for chip/graphics innovation
- Q3+ 2026: Full platform rollout

## **6. Marketplace**

A key part of PixelG is our upcoming marketplace where users can purchase games at lower prices using \$PIXG. Developers earn directly in PIXG, while users get exclusive access, voting power, and possible NFT rewards.

## **7. Fair Launch**

PixelG is built slowly and carefully.

- Max investment: 5 EUR per wallet
- Only when 10 million tokens are in circulation will we list on active exchanges
- No pump & dump, just long-term growth
